WHAT WE OFFER

End-to-End Automation for Your FMCG Business

From order processing to distributor management — we automate the workflows that slow your business down, so your team can focus on growth.

Workflow Automation

Automate order processing, invoicing, inventory updates, and data entry across your ERP, CRM, and spreadsheets using n8n workflows.

→ Save 20+ hours/week on manual tasks

AI Agents & Chatbots

Deploy intelligent chatbots on WhatsApp and web that handle distributor queries, order status, complaints, and FAQs — 24/7, in any language.

→ 80% queries resolved without human support

CRM & Lead Automation

Auto-capture leads from ads, websites, and WhatsApp. Auto-assign to sales reps, trigger follow-ups, and nurture with personalized campaigns.

→ Zero leads lost, 3x faster follow-up

Custom Dashboards & Reports

Real-time dashboards that pull data from multiple sources — sales, stock, production — giving you a single-pane view of your entire FMCG operation.

→ Instant insights, no more manual reports

System Integration

Connect your existing tools — Tally, ERPNext, Zoho, Google Sheets, WhatsApp, eCommerce — into one seamless ecosystem with zero manual handoff.

→ Eliminate data silos across departments

Custom AI Solutions

AI-powered demand forecasting, smart inventory alerts, auto-classification of products, and intelligent document processing tailored for FMCG operations.

→ Data-driven decisions, reduced waste

TAILORED FOR FMCG

Automations Built for Fast-Moving Consumer Goods

Every FMCG brand has unique operational challenges. Here's how our automation solutions solve them.

1

Automated Order Processing

Orders from distributors via WhatsApp, email, or portal are automatically captured, validated against stock, and pushed to your ERP — no manual data entry.

Result: 90% faster order processing

2

Distributor & Retailer Communication

AI-powered WhatsApp bot that handles distributor queries — order status, pricing, scheme details, payment reminders — automatically, in their preferred language.

Result: 24/7 support without additional staff

3

Inventory & Stock Alerts

Real-time stock monitoring across warehouses. Automatic low-stock alerts, reorder triggers, and expiry date tracking — all synced with your ERP and messaging tools.

Result: Reduce stockouts by 60%, cut waste by 35%

4

Sales Team Reporting & CRM

Field sales reports auto-collected via WhatsApp or mobile app. Data flows directly into your CRM — visit logs, new orders, feedback — zero manual entry at end-of-day.

Result: 100% field data capture, real-time visibility

5

Scheme & Promotion Management

Automate trade scheme communication, track scheme eligibility per distributor, calculate rewards, and send personalized scheme updates via WhatsApp.

Result: 5x faster scheme rollout

6

Invoice & Payment Reconciliation

Automate invoice generation, dispatch notifications, payment follow-ups, and bank reconciliation — keeping your accounts clean without manual effort.

Result: 70% reduction in payment delays

HOW IT WORKS

Simple. Fast. Effective.

1 Discover & Analyze

We audit your workflows, identify bottlenecks, and map out which manual tasks can be automated for the highest impact.

2 Build & Integrate

Our team designs and builds custom automation workflows, AI agents, and integrations tailored to your exact business needs.

3 Deploy & Optimize

We launch your automations, train your team, monitor performance, and continuously optimize for maximum ROI.

WHY BOOSTIFY

What Sets Us Apart

FMCG Domain Expertise

We understand distributor networks, trade schemes, field sales, and supply chain — not just code.

Enterprise-Grade Security

Your data stays yours. End-to-end encryption, role-based access, and compliance-first architecture.

Fast Delivery

Most automations go live within 1–2 weeks. You see results fast, not months later.

Ongoing Support

24/7 monitoring, maintenance, and optimization. We don't just build — we stay and improve.

TOOLS & TECHNOLOGIES

n8n | OpenAI / GPT | WhatsApp API | ERPNext | Tally | Zoho | Google Sheets | Shopify | PostgreSQL | Node.js | Python | React
